A Comprehensive Index to Volumes 1–27 of *Resources for American Literary Study*

HEATHER MORELAND
University of Maryland

This index is divided into three parts: an author index, a subject index, and an index of books reviewed. The author index lists the articles and reviews by the name of the author. The subject index references articles and books reviewed, by topic. The index of books reviewed lists the books that have been reviewed, by the name of the book's author, and gives the name of the reviewer in parentheses. Anonymous reviews have no reviewer listed and were written by the editors of the journal.

Works of literature are listed by the name of the author; books of letters and journals are listed by the name of the editor, with a cross-reference from the author. Each article, then, is listed by author and subject, and each review by the author of the book and the author of the review, with a cross-reference listed in the subject index. All entries give the volume and page numbers; pagination is consecutive within each volume. Subentries are given in chronological order.
